

Ridge Audubon Society's regular monthly pot luck and program meeting will begin at 6:00 p.m. on Tuesday, February 9 at the Audubon Nature Center in Babson Park. For Directions and details call 638-1355 between 10 am and 2:00 pm weekdays.

The program will be provided by Alico Land Management (Alico), which is engaged in the final planning of Winslow's Pointe, a new 500-home community to be located on 268 acres at the southeast corner of SR 640 and US 27.

Alico claims to have made numerous provisions for preservation of this environmentally sensitive land and that its approach to Crooked Lake will feature a "light footprint." The Alico presenters will answer questions and listen to suggestions from the audience. This will provide the communities of Babson Park and Crooked Lake with an unprecedented opportunity to visit with a developer during the planning stage. The public is invited.
